Create brand logos with DALL-E 3

Analyze reference logos

Upload your logos of choice and have GPT-4 describe their style

Example Prompt

"I want to generate a logo similar to this one. Describe a prompt I would use in DALL-E 3 to achieve this."

Example Demo

Generate logo idea

Switch over to the DALL-E 3 version of ChatGPT and use the generated description to craft a DALL-E 3 prompt

Step 1: Choose Type of Logo you want

Step 2: Add in details like your company name, industry, etc. to make the output more relevant.

Type of Logo

Lettermark

A lettermark of a letter "V", logo, serif font, vector, simple.

Mascot

A mascot logo of a tiger , simple, vector, white background.

Emblem

An emblem for a motorcycle club, vector, simple, black and white.

Review and refine

If needed, prompt DALL-E 3 to modify aspects like spacing, color, text, etc.

Export your creation

Download your polished, premium logo, integrating your brand identity with proven styles.

Takeaway: With GPT-4 reverse engineering logos and DALL-E 3 generating options, you can easily create professional visual identities inspired by your favorite brands.
